

## How to open Control Center

Tap on the bottom of the screen and swipe up with one finger.

## Control Center walkthrough

## Airplane Mode

Airplane Mode turns off Cellular, Wi-Fi, Bluetooth, GPS and Location Services on your iPad. If your airline allows it, you can turn Wi-Fi or Bluetooth back on, even while in Airplane Mode. While in this mode you can still listen to music, play games, watch videos, or use other apps that don't require Internet access.

### Wi-Fi

Turns the Wi-Fi signal on and off. This shortcut connects you to known Wi-Fi networks (networks you have previously connected to and that you already entered a password).

### Bluetooth

Turns the Bluetooth signal on and off. When Bluetooth is on, you can pair your iPad with Bluetooth devices such as headphones, keyboard, etc.

### Do Not Disturb

Keeps alerts and notifications from making any noises or lighting up the iPad screen when the screen is locked. It is an easy way to silence the iPad, while you are having dinner or you are sleeping.

### Lock Rotation - Orientation Lock

This icon lets you quickly lock the screen orientation (landscape or portrait). Orientation Lock complements the [iPad Side Switch](#) and can be configured to function as Mute instead.

### Music and Volume

You can control the music (play, pause, previous, next) that is being played as well as the volume.

### Timer

This is a shortcut to the Timer feature within the [Clock App](#).

### Camera

This is a shortcut to the [Camera App](#).

### Brightness

The slider lets you adjust the Brightness on your iPad screen.

### AirDrop

Lets you share your pictures, videos, links and other items wirelessly with other iOS 7/8/9 devices that are nearby and that support AirDrop. This feature transfers the information using Wi-Fi and Bluetooth.
